

## Change the physics owner component

You will change the physics owner component from the top assembly to the part file.

1. Open **mcd01\_training\_plant\_d**.

2. On the **Physics Navigator** , under the **Basic Physics** node, click the **Owner Component** cell for the **long conveyor : Rigid Body**.
3. From the list, select **MCD01\_LONG\_CONVEYOR**.
4. Under the **Basic Physics** node, click the **Owner Component** cell for the **long conveyor : Collision Body**.
5. From the list, select **MCD01\_LONG\_CONVEYOR**.
6. Under the **Basic Physics** node, click the **Owner Component** cell for the **long conveyor : Transport Surface**.
7. From the list, select **MCD01\_LONG\_CONVEYOR**.
8. Run the simulation to see the results, and then stop the simulation.  
  
The physics properties are now assigned to the **MCD01\_LONG\_CONVEYOR** part file. The physics are still applied in the top assembly.
9. Close the part without saving.

You completed the activity.
